Hinge Interlock Safety Switch Type: IDIS-2

## FEATURES:

IDEM IDIS-2 Compact Hinge Safety Interlock switches are designed to provide position interlock detection for moving guards.

They are designed to fit to the hinged axis of machine guard doors. The switch body fits to the door frame and the leaf actuator fits to the door.

The rugged Stainless Steel actuator profile is designed to fix to the door and provide a positively operated not easily defeatable interlock mechanism. They can be mounted unobtrusively away from direct vision or contact.

The compact body and 22 mm fixing profile make them easy to install where space is restricted.
The head can be rotated through 90 degree increments to provide ease of mounting in 4 positions.
Contact blocks are replaceable with optional slow or snap break operation.
